Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This communication is responsive to the amendment filed May 11, 2006.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites that the support member supports the flywheel in the radial direction. It is unclear if this claim further limits the language at the end of claim 1 or if it is redundant.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by JP ('928).

Art Unit: 3681

JP discloses a flywheel assembly (Fig. 4) comprising a flywheel (23), a damper mechanism (30), a support member (5), a radially inner surface for receiving the input shaft of the transmission, a radially outer surface for axially and radially supporting the flywheel (38), a plurality of axially and radially extending portions (29), an axial gap, a crankshaft side member, and support members (33, 43).

Allowable Subject Matter

Claims 11-38 are allowed.

Response to Arguments

Applicant's arguments filed May 11, 2006 have been fully considered but they are not persuasive. Concerning applicant's argument regarding claim 1, the examiner submits that the prior art discloses a radially inner and outer surfaces. Please refer to the provided clarification of the figure. As a result, the rejection is deemed proper.
